

Custom Miniature Screw Solutions Provider

In the realm of precision engineering, our Micro-Precision Screws stand out. These subminiature fasteners are meticulously crafted to handle delicate and intricate tasks. With ultra-fine threading, they offer unparalleled precision for demanding applications.

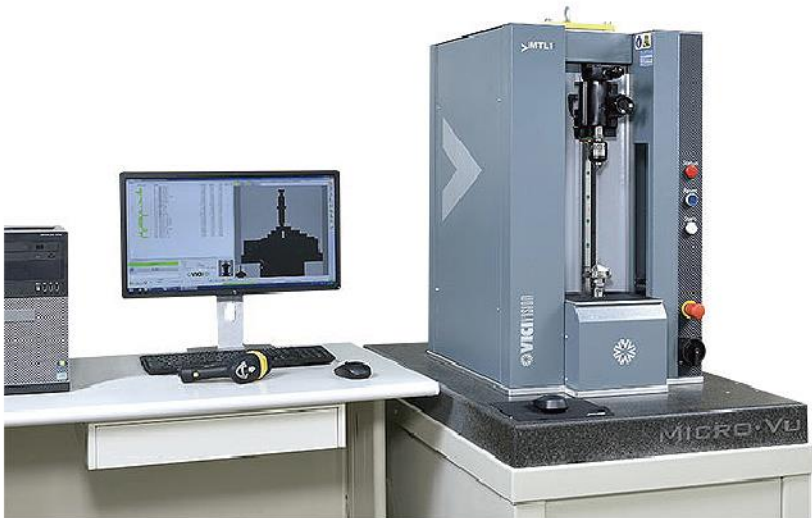

Our Nano-Precision Fasteners set the industry standard for minuscule components, making them ideal for cutting-edge technologies and high-tech products. Designed for miniaturization, these small screws have a significant impact on precision engineering. We provide custom miniature screw solutions. Whatever your requirements are, we provide you with everything from a single source.

CNC precision Manufacturing capability

- Nanometer-Class High-Speed Machining Machine
- Fully Automatic Control Surface Grinder
- High-Precision CNC Internal Grinding Machine
- High-Precision Centerless Grinder
- Mill-Turn Machining Center
- Precision Surface/Form Grinding Machine
- Wire Electrical Discharge Machining (EDM) Machine
- High-Rigidity Vertical Machining Center
- CNC Lathe
- Vertical Five-Axis Simultaneous Machining Center

CNC precision Testing Equipment

- CNC 3-Dimensional Coordinate Measuring Machine

- Optical Measurement Machine

- Computer Measurement Microscope

- Precision Profile and Shape Measurement Machine

- Two-Dimensional Electronic Height Gauge

- Two-Dimensional Image Measurement Instrument

- Surface Roughness Tester

- Height Gauge (Micrometer)

- 3D Fully Automatic Lens Inspection System

Materials

Alloy steel series

SCM415 、 SCM435 、 SCM440
、 SUP7 、 SUP10 、
AISI 6150 、 AISI 8620 、 AISI
E52100
SNM220 、 SUJ2 、 SKH51

Aluminum alloy series

2014 、 2024
3030
5N01 、 5005 、 5051 、 5083
6061 、 6063 、 6082
7005 、 7050 、 7075

Stainless steel series

SUS303(CU) 、 SUS304(F) 、
SUS316L(F) 、 SUS416 、
SUS430F 、 SUS440 、
SUS420J2

Special alloy series

Titanium, Beryllium copper
Phosphor bronze
