

Registration Opens for — Fastener Fair USA —

Registration is now open for Fastener Fair USA, America's leading fastener and fixing exhibition for the full supply chain, taking place May 22-23, 2019 at the Cobo Center in Detroit, MI.

Fastener Fair USA brings together manufacturers, distributors, suppliers, OEMs, and end users. It will be the meeting place for fastener professionals to see the latest technology and solutions, receive unparalleled education for all levels and industries, and make valuable connections, all in a convenient location in the heart of the Midwest manufacturing region.

A Chance to See the Latest Technology and Solutions

More than 300 exhibitors from around the world will showcase products, equipment, and solutions at the Detroit show. Attendees can easily discover and connect with manufacturers and distributors of industrial fastener, fixing, and joining solutions, and collaborate to solve product design business challenges. No matter where someone is in the supply chain, they'll appreciate seeing the latest technologies, innovations, and solutions for their business all in one place.

The floor map, including the full list of exhibitors to date, is available on the Fastener Fair USA website, so visitors can start to plan their visit to make the most of their show experience.

Unique Industry Education and Insights

Fastener Fair USA will offer a unique opportunity to get the latest industry information, forecasts, and technical education with keynotes and breakouts for all levels of experience, industry focus, and visitor segments.

Educational sessions are taught by industry experts. The Metropolitan Fastener Distributor Association and Women in the Fastener Industry will also conduct educational sessions.

New for 2019, the show will feature two stages on the exhibit hall floor to offer concurrent educational tracks targeted to distributors and OEM end-users.

Located in the Heart of the Midwest Manufacturing Region

Last year, more than 2,300 registrants from a variety of industries including mechanical engineers, product designers, purchasers and R&D personnel packed the exhibit hall looking for solutions to business challenges and exhibitors are already looking forward to what awaits them in Detroit.
