

Fastener Expo Shanghai 2021

Fastener World Magazine Draws Much Attention of Visiting Buyers

The twelfth edition of Fastener Expo Shanghai at NECC (Shanghai) came to a perfect closure on June 4th. More than 7,800 visitors came to the Expo, which included 215 overseas visitors and 8 industrial association purchasing delegations. Over 460 companies came to exhibit on the net floor of +30,000 square meters. **Having been dedicated to promoting high-quality suppliers and brands to the Chinese market for decades, Fastener World Magazine once again became one of the most popular stands visited by lots of exhibitors and visitors at the Expo this year and was also on the "must-visit" checklists of local representatives of many overseas fastener brands. Almost all free copies disseminated by Fastener World at the Expo this year (incl. China Fastener World Magazine, Hardware World & Fastener Components Magazine, and Emerging Fastener Markets Magazine) were taken by key buyers and high-ranking industry professionals during the 3-day event.**

According to the organizer, with the standardized implementation and high efficiency of precautionary measures against the Covid-19, the domestic economy of China has been in a full recovery and has even returned to the level before the pandemic. This Expo is a one-stop platform for big brands to increase their value, for SMEs to boost sales, and for a wide array of purchasers and distributors to establish a more complete supply chain.

At least 460 exhibitors gathered under one roof and exhibited their standard parts, non-standard parts, fastener manufacturing equipment, materials/molds/dies for fastener manufacturing, fastener inspection & testing instruments, automotive fasteners, wind power/nuclear power fasteners, high-strength fasteners, high speed rail/subway fasteners, aerospace fasteners, electronics fasteners, and many others.

Several companies, which have been increasing their market share in domestic or overseas markets through Fastener World Magazine for years, were also present this year, including Yuyao Biaoer, Tong Ming, Shanghai Fast-Fix, Sailuk, Hystron, Ningbo Anchor, Fontec Screws, Ningbo Weifeng, Jiaying Huahuo, Shanghai Tone Machine, Guangqingchang Metal Plastic, Jiangsu AWD, etc.

The next edition of Fastener Expo Shanghai is scheduled to take place again on June 8-10, 2022 at NECC (Shanghai).
