

The Specialist in Electronic, Automotive and Medical Precision Fasteners: Screwtech Celebrates the 25th Anniversary

Screwtech Industry Co., Ltd., is celebrating its 25th anniversary in 2024. ScrewTech is famous for its production of precision screws in sizes of M1-M14 and for industry leaders in electronic, automotive, and medical fields.

On Jan. 19, a grand celebration was held at Screwtech's plant located in Benjhou Industrial Park in Gangshan (Kaohsiung). Important partners from major European distributors, industry leaders, employees and their families were invited to witness Screwtech's transformation and growth in a lively atmosphere featuring a wonderful performance by the internationally renowned Dragon and Lion Dance Troupe.

Screwtech has now become a major player in the global precision fastener supply chain after first establishing itself as a major supplier to the high-tech computer industry and later extending its business reach to include the automotive and medical fastener industries.

The remarkable growth and development that can be seen over the past 25 reflects Screwtech's dedication to technological excellence and its commitment to manufacturing high quality products and providing top service to its extensive customer base in European and the American industrial markets.

Through its years of experience and know-how, the ScrewTech team has been able to provide strong product support to its customers and answer difficult or complex technical questions. ScrewTech staff are also able to issue inspection reports upon customer request, in an effort to minimize defective rates and related costs, and maximize the efficiency of operation, in order to continue to maintain its competitive edge in the international market.

Even though it has established a firm foothold in the market, Screwtech is still constantly researching and improving related machining technology and customer service, including the launch of "ScrewTech Buy" online purchasing platform in 2020 which provides customers with a wide range of small quantity items in stock.

Fion Peng, Screwtech General Manager, gave the following heartfelt reflection at the 25th anniversary celebration, "After majoring in economics in the university, I started my career in the fastener industry 25 years ago by chance. The development of Screwtech in early days was actually full of difficulties and challenges. As a result, I truly appreciate the selfless contribution and dedication of many people along the way in supporting us being originally a small factory to reach the current scale. I would also sincerely thank our loyal customers and manufacturers for their long-term support, as well as the dedication and assistance of our several experienced employees."

Screwtech's annual capacity averages about 1 billion pieces. Its headquarters is located in the New Taipei Industrial Park while its factory is in Benjhou Industrial Park in the south of Taiwan. The factory has a number of internationally recognized quality management certificates including ISO9001:2015, IATF16949:2016, and IECQ QC 080000:2017. With its incorporation of environmental, social, and corporate governance (ESG) standards, Screwtech also expects to obtain ISO14001 in 2024 and continue its ESG-driven improvements. In the future, Screwtech will continue to improve its technology and services, and play a strong role in helping the precision fastener industry to enhance its brand value with the best quality products. ■
