Jiaying Aoke Hardware Technology Co., Ltd. ("Aoke") is an industry-recognized professional manufacturer of furniture hardware and architectural hardware anchors. Headquartered in Haiyan Baibu Economic Development Zone, the company is conveniently located just over an hour's drive from Hangzhou and Shanghai. The nearly 4,000 sq. m factory produces a wide range of anchors, screws, nuts, stamped parts, turned parts and non-standard parts to meet the needs of domestic and international industries. Over the past 37 years, Aoke has become a stable and reliable source of supply for many customers, especially in the furniture and construction fields. In 2020, in order to expand its business and meet the needs of customers, it established Jiaying Aoke Trading Co., Ltd. With the advantages of both production & trading capabilities and the support of many associate factories, it provides more immediate and comprehensive services to its global customers.

### Automated Production Lines and No Compromise on Quality Control

Strict quality control, standardized management process and on-time delivery are the three main features of Aoke. Since more than 80% of its products are exported to overseas markets, mainly to Europe, S. America, Russia and many other countries/regions, there is no room for compromise on quality control. Aoke has a professional technical team with years of practical experience and can develop and manufacture dies on their own. With efficient punches, cold heading machines, polishing machines, die processing centers as well as other equipment and surface treatment capabilities, Aoke has the ability to respond to ever-changing customer needs.

"In addition to the introduction of advanced production equipment and management model in the traditional processing lines, we have also completed the construction of automated production lines for furniture hollow wall anchors, and continue to prioritize quality and provide customers with the best service as the ultimate goal," said General Manager Nick Wang.

### ISO9001 Certification and 10 Product Patents

Aoke's manufacturing process follows the ISO9001 international quality management system. In addition to providing standard parts, Aoke can also produce non-standard parts according to customers' drawings. Several sets of inspection equipment are readily available for inspection of dimensional specifications, surface treatments, and performance, and inspection reports can be provided to customers upon request. In addition to its OEM capability, which has been recognized by many large European and American companies, Aoke's mature product development capability has also been proven through the acquisition of 10 product patents.

"We've traveled to Germany, Vietnam, Indonesia and other countries to participate in exhibitions to let more people learn about our high quality products and services. We sincerely welcome customers to visit our factory and build a bridge of cooperation in the near future to form a mutually beneficial partnership," said General Manager Wang. ■
