

河北越通紧固件

360家国际企业大户一致肯定的高质OEM专家

Quality OEM Expert Recognized by 360 International Enterprises

Contact: CEO, Aimee Wu / Email: aimee@ytfasteners.com

10 Years of Export Experience & Total Solutions

Yongnian District of Handan City in Hebei Province is known as "China's City of Fasteners". Yuetong with over a decade of history in Yongnian District has expert knowledge of German DIN, American ASTM, British BSI, Indian BIS, Japanese JIS, ISO and other multinational standards. It takes timely shipment, in-factory inspection, quality and customer first as its main focus. Soon it has won the favor of more than 360 international and influential corporate players around the world.

The company specializes in producing threaded rods, flat washers, expansion bolts, hex nuts, hex bolts, sleeve type anchor bolts, and screws, which are supplied to the automotive, power transmission and power distribution, national defense, construction and other industries. Featuring "total fastener solutions" and through more than 10 years of export experience, it provides high-quality and most price competitive OEM services.

25,000 Ton Capacity & Customized Packaging

The factory is equipped with a total of 62 pieces of fastener production equipment, mainly including cold heading, thread rolling, screw tapping, and drawing machines, using high-quality steel and producing approximately 25,000 tons of standard parts every year.

In addition to providing OEM services on diversified products, the company can provide a variety of customized packaging according to customer needs, including small box packaging, carton

packaging, raffia bag packaging, and bulk packaging, along with high-speed and stable supply capabilities and customer-satisfying packaging services to support global fastener purchasing needs.

Dedicated Inspection Unit; Quality & Performance Guaranteed

Global buyers have increasingly stringent requirements for product performance and quality levels. Yuetong said even though its products are highly price competitive globally, it never skimps on precision and performance. To this end, it set up a dedicated quality inspection unit equipped with professional instruments and personnel to measure product hardness. It timely registers and archives measurement records as required to ensure strict inspection for global customers.

Asia Heralds Upcoming Purchase Demand; Yuetong Expands Global Supply

In 2024, product inventory level for overseas customers is coming down, and business opportunities for purchasing from Asia have reappeared. Yuetong's global product supply will not stop. They will further expand their market share on the existing basis and develop new markets and product lines. In the future, the company plans to start participating in international exhibitions and look for more business opportunities through product display. They will also expand their production scale and actively seek collaboration with more partners to make Yuetong's products more accessible internationally! □
