

INAFASTENER 2024- Automotive and Motorcycle Fasteners in the Spotlight This Year

2024印尼雅加达国际紧固件五金展- 汽机车用紧固件成本届焦点

The 6th annual INAFASTENER was held in JIEXPO Kemayoran, Jakarta, the capital city of Indonesia, on May 15-17 this year. It is one of the most important professional fastener and hardware exhibitions in Indonesia and ASEAN region supported by Indonesia Automotive Parts & Components Industries Association (GIAMM), Indonesia Automotive Workshop Association (ASBEKINDO), Indonesia Fastener Association (AFI), and attracts many domestic and overseas industry professionals and buyers to visit and make their inquiries every year. This year, Fastener World also sent our staff to participate in the exhibition on-site in order to build a bridge with the local supply chain and potential customers for those interested in expanding into the Indonesian market and extending their business reach to the neighboring ASEAN markets.

The exhibits on display included a wide range of industrial fasteners and fixings, assembly & installation systems, and storage & logistics services, with fasteners for conventional cars, electric vehicles and motorbikes being the most talked-about products of the show. It is understood that Indonesia's automotive industry has always been an important part of the country's manufacturing development. With the gradual transformation of the automobile industry to promote the development of electric vehicles, the Indonesian government has also set the goal of reaching the production target of 600,000 electric vehicles and 2.45 million motorcycles by 2030. Indonesia is also one of the largest motorcycle markets in the world. The Indonesian government has also set a goal of fully electrifying all new motorcycles sold by 2040, which is part of the Indonesian government's plan to electrify all new cars sold by 2050.

During the 3-day exhibition, Fastener World's booth attracted many local buyers who stopped by to read the latest magazines and ask for relevant supplier information. Many visitors also scanned the QR Code of Fastener World's official website to try out the digital B2B buying & selling platform, and the rich supplier information allowed them to see more purchasing channels and opportunities. This year, there were also several Taiwanese companies exhibiting and showcasing their new products and services that were of great interest to local buyers.

The organizer has not yet announced the date of the next show. For more information, please stay tuned to the official website of Fastener World. ■
