The Adventures of Hadware Doc and his assistant, Bolt Boy

After a busy season the Dynamic Duo decides to take a much needed vacation

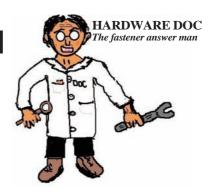

Pay attention! You should be reading your bolt history. For instance, the Industial Revolution caused a great demand for bolts & nuts. The old method of hand made parts could not keep up. The invention of the screw cutting lathe increased production a thousand folds & made interchangeable parts a reality. Locomotives, textile weaving machines, all sorts of machinery making thousands of commerical items needed bolts. The need for bolt standards was a result of the interchangability of bolts. And our industry started!! To continue...

BOLT BOY Faithful assistant to Hardware Doc

This cartoon column is the first and innovative cooperation between Fastener World Magazine and Thomas. It will run as cases are presented to Hardware Doc. Send your problems to this magazine and Doc, and his companion Bolt Boy will help in the fight against the foes: Torque Thug, Corrosion Ghost, The Fatigue Fiend and the other gremlins against fastener correctness. E-mail your questions for Hardware Doc to design@fastener-world.com.tw
