

# Li You Screw Industry

## Key Pillar for Electric Scooters & Automotive Supply Chain

Li You is headquartered in Hwa Ya Technology Park in Guishan District of Taoyuan City. 40 years ago, it started as an OEM screw manufacturer for resellers. Over the years, it has undergone technological innovations and restructured its business model, transforming itself into an important supplier specialized in customized high-precision screws for clients from industries including automotive screws, springs, gaskets, and lathed hardware parts.

Besides the model transition, it continued to increase capacity. In addition to the Penang (Malaysia) plant, it expanded scale with the establishment of Guang Zhen Feng Precision Screw in 2020, extending business to Asia and many other critical markets with fastener demands. Today, Li You stands as a high quality partner recognized in Taiwan and throughout the world.

### Multi-material, Multi-item, High Customization & Flexible Purchase

Li You's product line covers special screws, combination screws, hexagonal screws, trilobular thread screws, self-drilling screws, thread cutting screws and other precision screws, as well as rivets, studs, anchors, hexagonal wrenches, clip nut, rings, washers, nuts and other hardware accessories. Available materials include high and low carbon steel, free cutting steel, alloy steel, stainless steel, aluminum, titanium alloy, low-leaded brass, etc., with sizes ranging from 0.8mm to 12mm. Besides, the company established a highly flexible production management system to ensure it can provide customized production that meets customers' needs and creates advantages, and also achieve a monthly capacity of hundreds of millions of pieces. The ability to efficiently and flexibly supply products no matter how many pieces are required by clients makes Li You unique among its competitors.

Domestically, Li You has long been working with clients from the EV, industrial PC, industrial control system, optical, electrical and electronic industries. Overseas, it supplies to Asia-Pacific countries through Jiu Ji Guang Precision (Malaysia). The products manufactured in Malaysia are equivalent to those of the Taiwan headquarters.

### Progression From Quality Assurance to Environment-Friendly Certification

#### Li You Acts in Support of the GREEN Era

Li You is particular with manufacturing process quality. In less than 4 years it passed three ISO certifications including ISO 9001 (quality management), ISO 14001 (environment management) and IATF 16949 (automotive quality management). Its fasteners have made into the electric scooter supply chain. The company is focusing heavily on green manufacturing and continues to push for acquiring ESG and ISO 14067 (product carbon footprint) certifications.

To improve quality and expand the product line, it has invested in upgrading equipment over the years, including high and low temperature weather resistance testers, X-Ray coating thickness testers, XRF spectrometer automated material analysis device, salt spray testers, automatic optical sorters, and material push and pull testers, to ensure that product quality, tolerances, and inspections are in line with international standards. "We will continue to expand our current product line to include more components such as automotive fasteners, and we will work with our medical industry clients to develop products with high precision requirements. Harnessing 'Li You Manufacturing', we hope to become an indispensable key player in the international fastener supply chain," said the company. ■
