

Congrats! President Yung-Yu Tsai

Elected as the 20th Term of TIFI Chairman

Taiwan Industrial Fasteners Institute (TIFI), whose number of members has grown to 690, held the 20th term of new chairmen election and the 1st general members meeting of 2024 at HI-LAI Banquet in Kaohsiung on (Thu.) June 27, inviting representatives of the members from Northern, Central, and Southern Taiwan to join the event. In the Board of Directors meeting held earlier on the same day, Jinn Her Enterprise President Yung-Yu Tsai, who was formerly the Vice Chairman of TIFI, was voted by the board of directors to officially take over the position of the 20th term of Chairman from former TIFI Chairman Tu-Chin Tsai.

Chairman Yung-Yu Tsai, who has been fully involved in TIFI's affairs and operation for the past years, said, "Thanks to all members and guests for your participation in this meeting. The general meeting of members is the annual important and meaningful event of TIFI. This year we have been busy with CBAM and Net Zero Emission issues, which have increased costs, and the economy is not doing well, but this is both a crisis and a turning point for the better. In addition, we would like to thank the Ministry of the Interior (Taiwan), Ministry of Economic Affairs (Taiwan), TAITRA, Chinese National Federation of Industries, MIRDC, Taiwan CSC and other related organizations for their counseling and support to the fastener industry, which have enabled Taiwan fastener industry to continuously enhance the competitiveness in the international market. Taiwan International Fastener Show has been successfully held in June this year, and the International Fastener Expo in Las Vegas will be held in September this year, so we ask all members to continue to support the activities of TIFI, and we hope that with the support of all member manufacturers and directors & supervisors, TIFI can continue to progress and develop."

During the members meeting this time, Kaohsiung Mayor Chen Chi-Mai also came to congratulate new Chairman Tsai on his appointment and praised Taiwan fastener industry for its contribution to Taiwan's economic development, and encouraged the industry to make good use of TIFI and the resources provided by the government to cope with the current CBAM and more challenges in the future. Mayor Chen said, "The market and international trade regulations are changing rapidly, and digital transformation and netzero transformation have become very important for the industry. In response to the needs of the fastener industry, the "Net Zero Academy" of Kaohsiung City Government has organized special courses and provided subsidies for students. We also hope that the fastener industry can seek assistance from the relevant units of the city government through the association if they need any administrative assistance in the future."

The 20th term of Chairman, Vice Chairmen, Directors and Supervisors are as follow:
