CHIN LIH HSING PRECISION ENTERPRISE

Increases Production Capacity to Expand U.S. Auto Repair Parts Market Share

With extraordinary craftsmanship in machining, Chin Lih Hsing works closely with international auto parts companies and sells up to 90% of its automotive fasteners to the U.S. and Europe. The company takes pride in its ability to customize products based on customers' specific requirements. Their factory is equipped with 200 automatic lathes, 30 CNC lathes, 12 slotting machines and many secondary processing machines. This comprehensive setup enables them to achieve a substantial monthly production capacity of up to 80 million pieces, ensuring a stable supply with unwavering focus on quality and competitive pricing. They continue to pursue high quality and improve process control by adding process control systems to enhance production management.

Focus on the Automotive Parts Customer Base at IFE

At this year's IFE, Chin Lih Hsing will mainly display CNC parts and a wide range of threaded inserts in various materials and sizes, mainly for molding of plastic injection, heatstake, ultrasonic embedment and other applications. "The U.S. market has always been the primary market for fasteners, and American customers have always been our main target. IFE is the most well-known fastener professional exhibition in North America and has a large number of participants, so we hope to reach out to a wider customer base and develop the US market with new and existing customers to seek more collaboration opportunities," said the company. It has more than 35 years of experience in the machined parts industry and nearly 20 years in the field of automotive parts manufacturing, so it especially hopes to expand

the customer base of automotive parts. Further, it also looks forward to collaborating with various other industries to ultimately increase sales in the U.S. market.

ISO 9001 and IATF 16949 Certified

The company continues to pursue high quality and improve manufacturing processes, adding process control systems to improve production management. They also continue to invest in quality control equipment, including 11 optical sorting machines and a new 2.5D projector, hoping to enhance their capability through continuous improvement and progression to be the best support for customers. They are ISO 9001 and IATF 16949 certified, and can provide professional technical consulting services and assist customers in overcoming parts assembly problems. Chin Lih Hsing values the importance of quality requirement and is the best partner for customers looking to expand business.

GREEN Outlook and Production Capacity Improvement

In addition to conducting carbon inventory as well as carbon footprint assessment and monitoring, the company can also provide CBAM reports required by the EU. It is currently going paperless and has significantly reduced the use of paper. Through the introduction of a process management system, waste in the manufacturing process and carbon emissions are more effectively controlled and reduced.

Providing diversified products to meet customer needs has always been the company's goal. It hopes to improve capabilities and quality level through continuous progress to become the best support for customers.
